APTA TRANSform & EXPO 2026

October 1, 2026

Booth #1455 | October 4-7, 2026 | McCormick Place | Chicago, Illinois

"See Security Smarter for Transit"

One Solution. One Company. See Security Smarter for Transit.

IDIS Americas demonstrates a complete, purpose-built transit video ecosystem — not a collection of individual products.

About IDIS Americas

IDIS Americas designs, develops and distributes advanced video surveillance and security solutions for security and transit applications. For public transportation, IDIS brings together onboard video, centralized fleet video management, vehicle visibility and supporting cameras and accessories in an integrated I-Mobile ecosystem. Backed by South Korean engineering, R&D, and U.S. based support, IDIS is focused on practical innovation, scalability, cybersecurity, and lower total cost of ownership.

APTA 2026 — The IDIS Americas Solution

- IDIS Americas is at APTA to show a complete transit solution, not isolated products.
- The I-Mobile ecosystem connects onboard recording, centralized fleet video management and 360° vehicle visibility.
- The operational story is simple: SEE what is happening, UNDERSTAND incidents faster, and ACT with the information needed to investigate, respond and manage operations.
- The solution is designed to help agencies improve visibility, simplify video management, accelerate incident response and better protect passengers, operators and assets.
- The platform is positioned to scale from smaller deployments to large fleets while supporting interoperability with modern and legacy systems.
- IDIS backs the I-Mobile ecosystem with its 5-Year Ultimate Warranty.

Why Transit / Why IDIS

Transit agencies need video to do more than record an event. They need usable information across vehicles and fleets, faster access to the right footage, better visibility around vehicles, and technology that can be managed as an operational system rather than as disconnected devices.

- Fleet-wide visibility and centralized management
- Faster search, investigation and video retrieval
- Greater situational awareness onboard and around the vehicle
- Scalability and interoperability across mixed fleets
- A complete ecosystem that reduces the need to piece together multiple disconnected technologies

APTA Booth Experience

The booth experience is built around a live three-minute transit demonstration featuring IDIS Center for I-Mobile and Surround360. The goal is to quickly show how the technologies work together and then move the conversation into the visitor's fleet, project, operational challenge and next step.

SEE → UNDERSTAND → ACT

Featured Transit Solutions

IDIS Center for I-Mobile — See & Manage the Fleet: https://idisamericas.com/en/transit

Centralized fleet video monitoring, management, search and investigation. IDIS Center for I-Mobile brings onboard video into an intuitive environment for monitoring, search, device management and fleet-wide video management.

- Centralized access to fleet video
- Monitoring, search, investigation and device management
- Designed to scale from smaller deployments to large fleets
- Supports interoperability with modern and legacy systems

See what is happening. Find the video you need. Manage the fleet from one solution.

Surround360 — See In & Around the Vehicle: https://idisamericas.com/en/product/4335

Surround360 brings multiple exterior views together to provide a 360° surround view around the vehicle, helping reduce blind spots and improve situational awareness.

- True 3D Surround View
- Full HD imaging
- Integrated recording
- G-sensor impact detection
- Configurations for different vehicle lengths

Better visibility around the vehicle helps operators understand what happened — not just what one camera captured.

I-Mobile 4K NVR — Purpose-Built Onboard Recording: https://idisamericas.com/en/product/4019

The I-Mobile 4K NVR is the onboard recording foundation of the transit ecosystem, supporting high-resolution live video and multi-channel recording for mobile environments.

- Purpose-built onboard video recording and management
- Supports up to 4K live video and 16-channel recording within the I-Mobile platform
- Designed as part of a plug-and-play, scalable transit ecosystem
- Works with I-Mobile cameras, accessories and centralized management

I-Mobile Cameras & Accessories

A complete onboard video solution requires more than a recorder. I-Mobile cameras and accessories extend coverage throughout the vehicle and support the broader integrated transit ecosystem.

I-Mobile Platform / Product Family

The broader I-Mobile story includes the I-Mobile 4K-S (S Series) and I-Mobile 4K-C product families, supporting IDIS Americas' approach to purpose-built mobile video for transit fleets.

SmartConnect — Cloud-Hosted Fleet Video Management: https://idisamericas.com/en/smartconnect

SmartConnect is a cloud-hosted IDIS Solution Suite (ISS) management service for mobile fleets. Vehicle DVRs continue recording locally while IDIS manages the hosted platform infrastructure, software updates, monitoring, reporting and storage administration. It is designed to reduce the IT burden of managing fleet video while making it easier to scale vehicles and users.

- Recording remains on the vehicle DVR, helping preserve video through changing mobile network conditions
- IDIS hosts and manages the ISS environment, including platform maintenance and updates
- Authorized users can remotely locate and request selected clips; full recordings remain on the vehicle DVR
- Supports cellular connectivity and available depot Wi-Fi for supported configurations
- ISS Clip Archive helps teams request, organize, review and securely share important video
- SmartConnect Dashboard provides centralized visibility into cloud storage, data usage, subscription details, account activity and reporting
- Subscription-based model is designed to reduce infrastructure ownership and simplify scaling and budgeting

SmartConnect lets transit teams focus on using video while IDIS manages the IT behind it.

I-Mobile 4K-S — New Technology Preview

The I-Mobile 4K-S is new technology coming to the IDIS Americas transit portfolio. A non-operable sample will be available at APTA for preview. It should be presented as an upcoming technology preview—not as a live, shipping or fully demonstrated product.

- New technology preview for the I-Mobile transit portfolio
- Physical sample at APTA is non-operable
- Use the sample to discuss design direction and the evolving I-Mobile platform
- Do not imply current availability, live functionality or final specifications unless separately confirmed

Media FAQ / Interview Reference

Q: What is IDIS Americas showing at APTA TRANSform & EXPO 2026?

A: A complete transit video ecosystem centered on I-Mobile. The live booth experience connects IDIS Center for I-Mobile with Surround360 and reinforces the broader solution, including I-Mobile cameras, 4K recorders and accessories.

Q: What makes the APTA demonstration different from a standard product demo?

A: The demonstration is built around an operational workflow rather than a feature list. In about three minutes, visitors see how a transit team can view what is happening, understand an incident faster through centralized video and greater situational awareness, and act on the information.

Q: What problem does IDIS Center for I-Mobile solve?

A: It helps bring onboard video into a centralized fleet environment for monitoring, search, investigation and device management. The objective is to make fleet video easier to access and manage without treating each vehicle as an isolated system.

Q: What is Surround360?

A: Surround360 is a vehicle visibility solution that combines multiple exterior views into a 360° surround view. It is designed to help reduce blind spots and provide greater situational awareness around the vehicle.

Q: Is IDIS focused only on cameras for transit?

A: No. IDIS is presenting a purpose-built ecosystem that includes onboard cameras, 4K recording, centralized management, Surround360 and accessories. The value is in how the pieces work together.

Q: How does the solution scale?

A: The I-Mobile platform is designed to scale from smaller deployments to large fleets while maintaining interoperability with modern and legacy systems. This allows the conversation to focus on the agency's operational needs and fleet environment rather than a one-size-fits-all deployment.

Q: What is the value of centralized fleet video management?

A: Centralization can make it easier for transit teams to monitor systems, locate needed video, investigate incidents and manage video across the fleet. The emphasis is on simplifying access to information and supporting faster operational response.

Q: How does IDIS address total cost of ownership?

A: Integrated ecosystem, scalability, interoperability, plug-and-play deployment and the IDIS 5-Year Ultimate Warranty. Together, these are intended to simplify deployment and long-term system management.

Q: Does the I-Mobile solution support high-resolution video?

A: Yes. The I-Mobile platform supports up to 4K live video and 16-channel recording, depending on system configuration.

Q: What does 'See Security Smarter for Transit' mean?

A: It describes the shift from simply recording video to making video more useful operationally: seeing what is happening, understanding incidents faster and acting with better information.

Q: How is IDIS approaching interoperability?

A: The I-Mobile platform is designed with scalability and interoperability in mind, including modern and legacy environments. For detailed integration or compatibility questions involving a specific third-party system, bring in the appropriate IDIS technical representative rather than overcommitting in an interview.

Q: What warranty supports the transit solution?

A: The I-Mobile ecosystem is backed by the IDIS 5-Year Ultimate Warranty.

Q: What is IDIS Americas' broader transit objective?

A: To provide agencies with a purpose-built, end-to-end transit video solution that improves visibility, simplifies video management, supports investigation and helps protect passengers, operators and assets.

The Agency Challenge

- Transit fleets generate large amounts of video, but the value comes from being able to find and use the right information quickly.
- A single camera view rarely tells the complete story of an incident.
- Agencies operate mixed fleets and need technology that can scale and work within real-world environments.
- Video is increasingly part of day-to-day operations, investigation and situational awareness — not only post-incident evidence.

The IDIS Solution

- Centralize fleet video with IDIS Center for I-Mobile.
- Expand visibility around the vehicle with Surround360.
- Capture onboard video through the I-Mobile recorder, camera and accessory ecosystem.
- Bring the pieces together as one transit solution rather than separate products.

Why IDIS

- We're not showing individual products at APTA — we're showing how the complete transit solution works together.
- The goal is to help agencies see what is happening, understand incidents faster and act with better information.
- Centralized video management turns onboard video into a fleet-wide operational resource.
- Surround360 helps tell the story around the vehicle, not just from a single camera angle.
- One Solution. One Company. See Security Smarter for Transit.

APTA Promotion & Booth Engagement

The booth promotion, 'See Security Smarter in Chicago,' is designed to create engagement around the three-minute Transit Solutions experience.

- Two pairs of Meta Glasses will be awarded during the show: one winner on Day 1 and one winner on Day 2.
- Attendees complete the three-minute IDIS Transit Solutions demo at Booth #1455 to be entered.
- Winners do not need to be present for the drawing but must return to the booth to claim the prize.
- LinkedIn follower campaign: visitors who follow IDIS Americas on LinkedIn and show reception can receive the APTA challenge coin.
