

Essentra Acquisition of Device Technologies Creates Stronger Solutions for Public Transport

Device Technologies, Inc. (DTi) has recently been acquired by Essentra plc, a leading global manufacturer and provider of essential components and solutions.

They have worked together successfully for many years on key distribution projects, making the acquisition a natural strategic fit. By combining Essentra's extensive range of access hardware - including hinges, latches, handles and locks - with DTi's specialist grommet edging, cable sleeving, door and window seals, they can now offer a broader, more integrated portfolio for public transport applications.

Together, Essentra and DTi are well positioned to support rail, bus and other transport manufacturers with components that improve equipment protection, reliability, safety and ease of installation.

Scott Fawcett, CEO of Essentra, said: "We are pleased to welcome another high-quality business, with a strong track record of growth, into the Essentra Group. DTi strengthens Essentra's product portfolio, expands our presence in the Americas, and unlocks significant cross-selling opportunities."

In the short term, customers will see no changes as the companies integrate their products and systems. Over time, the combined organization expects to deliver greater value through an expanded product portfolio, complementary technical expertise, and broader domestic and international distribution capabilities.

About Device Technologies, Inc.

Founded in 1984, and based in Massachusetts, DTi designs, manufactures, and sells specialty protection components: grommet edgings, edge seals, trims, sleeving & wrap, and high-performance magnet wire.

These products are used across a wide spectrum of industries and OEM's including Rail and Buses, Aerospace, Avionics, MRO applications, Automotive, Tactical Military Equipment, Wind Turbines, Telecom, Power systems, IT Servers, HVAC equipment, Medical, Gaming, and Food Service Manufacturing.

DTi continually invests in R&D to improve its products and processes to enhance cost savings and efficiency gains for its clients. DTi is fully compliant with ISO 9001 and AS 9100 standards.

Spring Fast®, Seal-Fast™ are registered trademarks of Device Technologies, Inc.
