**FOR IMMEDIATE RELEASE**

## **VersaLogic's Sabertooth AI Honored with Platinum Award for Innovation**

Tualatin, OR — October 21, 2025 — VersaLogic Corporation, the industry's most trusted embedded computer company, announced today that its "Sabertooth AI" was recognized among the best by the 2025 MAE (Military + Aerospace Electronics) Innovators Awards. Votes placed by the engineering community recognized VersaLogic Corporation as a Platinum Honoree in the Embedded Computing category.

The 2025 MAE Innovators Awards celebrates outstanding innovation in defense and aerospace for the engineering industry. Every year they showcase and reward companies, designers, and innovators who have contributed to the advancement of technology through their creative and impactful designs.

2025 MAE Innovators Award winners are chosen by the qualified judging panel chosen by the editorial staff at Military + Aerospace Electronics. Platinum, Gold, and Silver honorees are revealed every fall.

### **Sabertooth AI's Innovative Impact**

The Sabertooth AI embedded computer represents a breakthrough in high-performance, rugged edge computing for defense and aerospace applications. Built for mission-critical environments, the Sabertooth AI delivers advanced AI and GPU processing in an ultra-compact form factor—dramatically expanding the capabilities available to designers, systems integrators, and end users operating at the edge.

The Sabertooth AI is helping engineers accelerate the deployment of next-generation autonomous and intelligent platforms. Its real-time AI capabilities empower a range of applications—from object detection and classification to predictive maintenance and autonomous navigation. Developers can rapidly prototype and deploy AI models leveraging NVIDIA CUDA programming, Lovelace Architecture, and other tools to optimize performance.

### **About VersaLogic Corporation**

VersaLogic delivers state-of-the-art embedded computers, coupled with expert technical support, for critical markets such as medical and defense. Featuring long-term availability, -40° to +85°C operation, MIL -STD-202 shock and vibration testing, and outstanding US-based support, VersaLogic products are ideal for critical applications that value ruggedness, reliability and long life. A 40+ year history of consistency has earned VersaLogic the reputation of being "the industry's most trusted embedded computer company." For more information, visit VersaLogic.com.
